

# AI & Microsoft Copilot QUICK REFERENCE

Your essential guide to using AI safely at CFS

**THE GOLDEN RULE** · Protected data NEVER goes into unauthorized AI tools.

## ✓ APPROVED — Microsoft Copilot

### CFS'S AUTHORIZED AI PLATFORM

- ✓ Covered by a HIPAA Business Associate Agreement
- ✓ Brainstorming, drafting, summarizing public content
- ✓ Grammar checks & writing/debugging code
- ✓ Anonymize whenever possible, even in Copilot

If you use AI at work → use Copilot

## ✗ PROHIBITED — Public AI Tools

### NOT APPROVED FOR CFS WORK

- ✗ Free ChatGPT, Gemini, Claude & similar tools
- ✗ AI meeting note-takers / transcription (unless approved)
- ✗ Any tool without IT approval
- ✗ Want a new tool? Ask IT first

No IT approval → it doesn't touch CFS work

**What is Protected Data? (NEVER in public AI)** Names, initials, addresses & dates of birth · phone numbers, emails & SSNs · medical info, diagnoses & service notes · IEP / Life Plan / Person-Centered Plan data · anything that could identify someone we support or our staff

## Can I Use AI For This? — Quick Decision Guide

| SITUATION                                      | USE AI? | WHY                                                 |
|------------------------------------------------|---------|-----------------------------------------------------|
| Brainstorm ideas for an event or training      | ✓ Yes   | No protected data involved                          |
| "Summarize John's progress notes"              | ✗ No    | A name plus health info is PHI — never              |
| Draft a public flyer, template, or policy      | ✓ Yes   | Public, non-confidential content                    |
| Write a final IEP / Life Plan                  | ✗ No    | AI may only help with non-confidential first drafts |
| Check grammar on a non-confidential document   | ✓ Yes   | Nothing identifying anyone we support               |
| Make a clinical decision or assessment         | ✗ No    | Clinical judgment belongs to humans, never AI       |
| Record or transcribe a meeting with an AI tool | ✗ No    | Prohibited unless specifically approved             |

### Human-in-the-Loop

AI is a FIRST DRAFT, never a final product. Review and validate everything — you are responsible for accuracy.

### No Blind Copy-Paste

AI can be confidently wrong ("hallucinations"). Always fact-check critical information against the source.

### When in Doubt, Ask

Unsure whether AI is appropriate? Contact IT or your supervisor BEFORE using it — not after.

### RULE OF THUMB

Could it identify someone we support? → It doesn't go in AI.

**Questions or concerns?** Your Supervisor · IT Department · HIPAA Security Officer · [HelpDesk@CFSNY.org](mailto:HelpDesk@CFSNY.org)
